

## SR522 Improvement Project

### CONSTRUCTION UPDATE – September 11, 2009

#### **Paving: 68th Ave. NE, NE 181st St. and 73rd Ave. NE**

Starting on September 14, crews will be completing pavement preparation, the installation of traffic loops and a final pavement overlay as part of the SR 522 Improvement Project. This work will occur on 68th Ave. NE between NE 175<sup>th</sup> St. and NE 181st St, on NE 181st St. from 67th Ave. NE to just east of 68th Ave. NE, and on 73rd Ave. NE from NE 181st St. to SR 522. From the pavement preparation to the final overlay, this work is anticipated to take two to three weeks.

#### Traffic control and safety

This work will limit traffic to one lane in each direction through the construction zone between the hours of 9 a.m. to 3 p.m.; temporarily shifting lanes allows crews to complete this work as efficiently and safely as possible. Flaggers and traffic control will be in place to safely guide vehicles through the work area.

#### What to expect during construction:

- Temporary lane closures and traffic shifts.
- Additional construction equipment and noise.
- Vibration and back-up alarms associated with construction vehicles.
- Pavement grinding.

#### **Night Work: SR 522 Roadway Striping**

Over the next couple of weeks crews will be working at night to complete the permanent roadway striping on SR 522 between 65th Avenue NE and 73rd Avenue NE. This work follows the final pavement overlay that was finished in early September. Temporary lane closures and traffic shifts are in place to safely guide vehicles through the construction. Night work hours are Monday through Thursday, 7 p.m. to 5 a.m.
