

SR522 Improvement Project

CONSTRUCTION UPDATE – May 26, 2009

Night Work – Pavement Overlay on SR 522 (73rd Ave. NE to 83rd Pl. NE), 80th Ave. NE and 83rd Pl. NE

Beginning tonight, May 26, crews will begin the final pavement overlay on SR 522 between 73rd Ave. NE and 83rd Pl. NE. Last week, the pavement pre-level or base layer was completed. Crews will now work one lane at a time to finish the final pavement layer. This work should take approximately one week to complete with a few additional nights for final adjustments.

Following paving on SR 522, sections north of SR 522 on 80th Ave. NE and 83rd Pl. NE will be completed. This work will take place during the day.

While methods to reduce construction noise will be in place, noise from the construction site should be expected. Residents should anticipate the following:

- General construction equipment and noise
- Vibration and back-up alarms associated with construction vehicles
- Pavement grinding
- The "hum" of generators

It is necessary that this work be completed at night as lanes will need to be shifted on SR 522. This work will limit traffic to one lane in each direction between the hours of 9 p.m. and 5 a.m. Flaggers and traffic control will be in place to ensure safe travel through the work zone for vehicles and pedestrians. Night work hours are Monday through Thursday, 7 p.m. to 5 a.m.

Note that this work has been previously delayed due to weather. **Paving is weather dependent and cannot be done if the weather is too cold or if the area is too wet. If there is a weather delay, work will commence as soon as weather conditions allow.**
